

HANDRAIL SYSTEMS

AUSTRALIAN DESIGNED AND MADE

THE EDGE HANDRAIL RANGE

- **EDGE I** is designed for industrial use with rotomoulded end caps to allow articulation every 3 metres and with top, mid and kick rails.

- **EDGE II** is manufactured using rotomoulded stanchions to support eight horizontal pipe rails providing a visually appealing and cost effective solution.

- **EDGE III** is a standard vertical handrail system with top, middle and kick plate rails complete with end cap option. The reinforced baseplate will attach to any flat surface.

FEATURES & BENEFITS

- Extremely strong rotomoulded polyethylene construction
- Highly resistant to harsh climatic and industrial conditions including rust, corrosion, fuel and acid
- Complies with Australian standard AS1657
- UV11 rating
- Odourless and inert
- Available in a range of colours including high visibility
- Easily installed in minutes, quick adaptation of kick rail using 4 bolts
- Formed end caps allow for individual module articulation with no pinch points
- Lightweight – attach using existing location points, no alteration of existing structure
